

# HAND-HELD METAL DETECTOR

A straightforward,  
essential companion  
to an in-line  
metal detector

ERIEZ  
**METALARM**  
METAL DETECTORS

## Specification

- Housing: Polyamide
- Weight: 720grms
- Colour: Yellow
- 'Power On' LED indication
- Audio and visual alarm
- Detection performance:  
1mm ferrous or non-ferrous
- Voltage: 110 or 230V,  
50 or 60 Hz
- Voltage models:  
GA-22-A HH for UK 13 Amp plug  
GA-22-B HH for European 2 pin plug  
GA-22-C HH for USA 2 pin plug

**Important note:** A metal free area is required around the product being checked.

## Comprehensive Range of Metal Detectors

Also available: a choice of single-sider and aperture type detectors. Please enquire for details.

## Applications

When an in-line metal detector, whether aperture type or a single sider metal detector, has detected metal there still remains the problem of establishing the exact position of the metal detected in order to ensure its effective removal.

This problem is overcome by using the **ERIEZ METALARM** Hand-held Detector which is designed to pinpoint the exact position of small pieces of metal, whether ferrous, non-ferrous or stainless steel.

This portable, hand-held device is used in

**Plastics and paper industries** for pinpointing metal in sheet materials

**Textile and clothing industries** for checking location of pins or pin heads left by accident

**Food and packaging industries** for final, routine quality checks on low height products.

## Features and Benefits

- Detection down to 1mm sphere of metal
- Detects all types of metal
- Easy to use - simple 'plug in and go', no adjustments required
- No batteries needed
- Robust design
- Easy to hold
- Visual and audio alarms when metal is detected
- Auto re-set
